

Manmeet Singh

Full-Stack Developer | React Native Developer

✉ manmeet.dev@outlook.com | 🌐 manmeet-singh-dev | 🐙 thatsmanmeet | 🌐 thatsmanmeet.com

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Kotlin, SQL

Front-End: React.js, Next.js (SSR), Redux Toolkit, Tailwind CSS, HTML5, CSS3

Mobile: React Native, Expo, Expo Router, Android (Kotlin), Jetpack Compose

Back-End: Node.js, Express.js, RESTful APIs, JWT Authentication, BetterAuth

Databases & ORMs: PostgreSQL, MongoDB, Redis, Supabase, Drizzle ORM, Mongoose

Tools & DevOps: Git, GitHub, Docker, Postman, VS Code, Figma, Jira, CI/CD

EXPERIENCE

Product Support Engineer

August 2025 – April 2026

Qualitia Software

- Resolved 100+ critical-severity issues within SLA by developing custom Java automation scripts and Selenium test suites.
- Authored developer-facing technical documentation that reduced repeated support queries, streamlining customer self-service.

Web Development Intern

December 2022 – February 2023

Graphyx – Unacademy

- Led end-to-end development of a course sales demo website from Figma design to deployment; built a reusable component library adopted across 3 internal projects.

PROJECTS

Arcanize PDF | React Native, Expo Router, Drizzle ORM, TypeScript

Website | Google Play

- Developed and published a production Android app on Google Play – an offline-first PDF toolkit featuring document scanning, PDF merging, splitting, compression, and password encryption.
- Architected file-based routing using Expo Router and integrated Expo native modules for fast, private on-device PDF processing.

BugRecon | React, Redux Toolkit, Node.js, Express, MongoDB, Tailwind CSS, JWT

Live Demo | GitHub

- Architected a scalable full-stack project management platform with real-time issue tracking and team collaboration using the MERN stack.
- Implemented secure RESTful APIs with JWT authentication and role-based access control (RBAC); managed client state with Redux Toolkit.

ByteBazaar | React, Redux Toolkit, Node.js, Express, MongoDB

Live Demo | GitHub

- Built a secure, full-stack e-commerce platform with seller-specific dashboards for managing products, orders, and analytics using React, Redux Toolkit, and Express with MongoDB.
- Implemented secure payment flow, product CRUD operations, and role-based seller/buyer access, delivering a complete online shopping experience.

MeetID | PostgreSQL, Drizzle ORM, Express, Node.js, TypeScript

Live Demo

- Engineered a full-stack OpenID Connect (OIDC) Identity Provider (IdP) enabling OAuth 2.0 single sign-on (SSO) authentication across client applications.

Clipboard Cleaner – Copy Paste | Kotlin, Jetpack Compose

Google Play

- Developed an offline-first Android app to manage clipboard history with one-tap clearing, real-time text extraction, and a searchable Material Design UI.

EDUCATION

University Institute of Engineering and Technology

Bachelor of Technology in Computer Science and Engineering

Kathua

2020 – 2024
